

NC-3000 PQ Kit /Slide 912-0019

Contents P/N: 071-0035 One vial with 1.5 mL of fluorescent 10 µm beads, low bead concentration.

> P/N: 071-0036 One vial with 1.5 mL of fluorescent 10 µm beads, medium bead concentration. P/N: 071-0037 One vial with 1.5 mL of fluorescent 10 µm beads, high bead concentration.

> > Buffer solution: 0.02% Tween-20 and 2mM ~ 0.01% NaN₃ in H₂O.

CAS no. for Tween-20 is 9005-64-5 CAS no. for NaN3 is 26628-22-8 EINECS no. for NaN₃ is 247-852-1

Application NC-3000 PQ Kit /Slide is used for performing a Performance Qualification (PQ) of the NucleoCounter

NC-3000™. The test kit is not a counting standard.

NC-3000 PQ Kit /Slide contains multicoloured beads that allow testing of the performance of the **Principle**

counting capabilities of the NucleoCounter® NC-3000™. The vials contain various concentrations of two types of beads. All vials contain beads that will be detected in the AO and DAPI channel.

Both bead types will contribute to the total counts.

With respect to the description of the detailed PQ procedure, please refer to the appropriate Use

application note, certificate and user manuals for the NucleoCounter® NC-3000™ instruments and

the NucleoView™ Software.

NC-3000 PQ Kit /Slide is for research and development purposes only and is not for diagnostic or

therapeutic use.

Storage The fluorescent bead solution should be stored at 2-8°C. Protect against light.

Stability The shelf life for the kit is 15 months from the production date. The expiry date is shown on the kit

as well as on the bead vial label.

Safety Fluorescent bead solution: In case of contact with eyes, rinse immediately with plenty of water Information

and seek medical advice.

If a spill is observed perform a clean-up of the area, which may have been in contact with the

solution.

Use gloves and suitable protective clothing.

Please also refer to SDS regarding safety information.

Disposal of After use, the NC-3000 PQ Kit /Slide should be disposed of according to national or local laws and

regulations regarding the nature of the mixture it contains.

Waste
